PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience in web and mobile development. Proficient in React, Next, Laravel, and Flutter, with a strong focus on clean architecture, user experience, and delivering production-ready applications. Experienced in agile environments and passionate about building efficient solutions.

EDUCATION

B.Sc. in Computer Science — Lebanese International University *2022 – 2025*

PROFESSIONAL EXPERIENCE

Software Developer Intern — Digital Hub, UNRWA *January 2026 – May 2026*

- Completed an intensive program covering full-stack web development and AI fundamentals.
- Built web applications using React, Vue and Next.js. Used state management solutions like TanStack, Zustand.
- Developed backend APIs with Node.js, Express.js, NestJS, and Python (FastAPI/Django).
- Worked with MySQL, PostgreSQL, Supabase and MongoDB for database design and management.
- Implemented authentication, REST APIs, and full-stack integration (MERN and Python-based systems).
- Applied Git, GitHub (collaboration, pull requests), Agile/Scrum practices (including sprint planning and Jira).

SKILLS

Mobile: Flutter (Dart) — state management, reusable widgets, Firebase integration, REST APIs
Frontend: React.js, Next.js (App Router),Vue, TypeScript, responsive UI design
Backend: Express.js, Laravel, Inertia.js, Django, FastApi, Nest Node.js, Prisma ORM, NextAuth.js, Supabase
AI/Integrations: Claude API (Anthropic), GitHub API
Databases: PostgreSQL, MySQL, Firebase Firestore, Supabase, Mango
Tools: Git & GitHub, Jira, Trello, Agile/Scrum **Hosting:** Vercel, Render, Railway
Soft Skills: problem-solver, adaptable, team-oriented **Languages:** Arabic (Native), English (Fluent)

PROJECT EXPERIENCE

DevConnect — *Vue.js · Laravel · Inertia.js · MySQL · Redis · Claude API · GitHub API · Github · Live*

- Full-stack developer community platform where junior developers discover project ideas, form teams, and collaborate, with AI embedded throughout as a senior capstone project.
- AI-powered project matching and GitHub issue scanner rank opportunities against each user's skills and activity; real-time chat, task board, decision log, and a passive project health monitor power the team space.
- On completion, AI generates ready-to-copy CV bullets, portfolio descriptions, and LinkedIn posts; teammates rate each other across three dimensions feeding into a reputation score.

Digital Hub — *Node.js · Express · React · PostgreSQL · Redis · Github · Live*

- Full-stack learner management platform serving three audiences — public visitors, admins, and recruiters — from a single monorepo with a React SPA and Express API.
- Dual admissions pipelines with shared interview scheduling, WhatsApp and email messaging, delivery tracking, and bulk-retry for failed sends.
- Built a headless CMS with live theme token editing and a Redis-backed public content cache with graceful degradation when Redis is unavailable.

Aurum Realty — *Next.js · React · Prisma · PostgreSQL · NextAuth.js · Github · Live*

- Full-stack luxury real estate platform with a bilingual (English/Arabic) public website and a role-based admin dashboard managing properties, blog posts, news, and all CMS content.
- Implemented dynamic RBAC stored entirely in the database — Super Admin can create custom roles with granular permissions at runtime, with no code changes required.
